SIDS scholarships for MSc Specializations at UN-IHE Institute for Water Education, Delft, the Netherlands

Dear High Commissioner Waqabaca,

We would be grateful if you could forward this scholarship opportunity to interested organisations and individuals in your capital.

Water professionals from

Fiji are encouraged to apply.

In 2015, the Ministry of Foreign Affairs of the Kingdom of the Netherlands and IHE Delft jointly launched the scholarship programme "Strengthening Small Island Developing States' capacity in the water sector to cope with the effects of climate change". The overall aim of the fellowship programme is to strengthen the capacity of professionals and decision makers to improve water management in Small Island Developing States (SIDS), to better address future challenges such as coping with the effects of climate change. More than 20 students from SIDS worldwide will have graduated with an MSc by the end of April 2018.

The Government of the Kingdom of the Netherlands is pleased to announce that it has decided to extend the programme by offering another fourteen scholarships.

Candidates from the Pacific, the AIMS and the Caribbean are invited to apply by 1 July 2018 at the latest.
